Context

History

Gene:

recA

Gene id:

IGI00136526

Encoding:

Protein recA

Genomic component:

Chromosome

Homology:

Orthologues

Paralogues

Synonyms:

BL05164, BL01918, Protein recA, Recombinase A, recA

Gene Ontology:

Function ⓘ

nucleotide binding, single-stranded DNA, ATPase activity, nu

Biological Process ⓘ

DNA metabolic process, response to DNA dan

Cellular component ⓘ

cytoplasm
